Bike rental system

Feb 2024 - Jun 2024

A web-based application to rent bikes online using HTML, CSS, JavaScript for frontend and SQL for backend data storage. Includes user booking form and bike inventory management system.

User Interface: Designed using HTML & CSS for a clean and responsive layout.

Browse Bikes: Users can view available bikes along with details like model, price/hour, and location.

Booking Form: Created using JavaScript for form validation and interactive behavior (like dynamic price calculation).

Data Management: Booking and bike data stored and managed using SQL database.

Admin Panel (Optional): Allows admin to add, edit, or delete bikes from the list and view all bookings.
